5th Cross, 6th Main RPC Layout, Vijayanagar, 2nd Stage,  
Bengaluru Karnataka - 560040

**Subject: Letter of Recommendation**

I am pleased to write this letter of recommendation for Akshath Raghav, who served as an **Intern – Data Scientist** at **Datair Technology Private Limited**. During his internship tenure with us from **March 16, 2023, to July 31, 2023**, he made a remarkable impact on our team and contributed significantly to our projects.

He actively participated in discussions, offered insightful suggestions, and approached problem-solving with creativity and diligence. His teamwork skills and positive attitude not only enriched our working environment but also led to increased productivity and efficiency among the team.

Akshath's exhibited exceptional programming skills with AWS services, particularly AWS Glue, Spark, Glue Catalog, Athena, S3, and Redis, was impressive. Your ability to design, develop, and implement the ETL job, which involved scraping weather data, showcased a deep understanding of the AWS ecosystem and its integration possibilities. The way you leveraged AWS Glue's data catalog, used Spark for data processing, and utilized Athena for querying and analysis reflected your excellent grasp of these technologies.

He was instrumental in the successful scraping and analytics of weather data, showcasing proficiency in implementing innovative solutions to complex challenges.

In conclusion, I wholeheartedly recommend Akshath's for future opportunities as a Data Scientist or related roles. His exceptional work ethic, technical expertise, and interpersonal skills makes him an outstanding candidate. I am confident that he will continue to excel and make valuable contributions wherever he chooses to pursue his career.

All the best!

Kind Regards,

---
